Connections and Integrations

On the Manage Data > Alerts > Connections page, you can configure:

- Webhook Connections
- ServiceNow Connections

You can also:

- Search Connections to search.
- Edit Connections.
- Delete Connections.
- View the Details of Connections.

To be able to create a connection, the Manage Connection role capability must be set. Contact your administrator for assistance.

Sumo Logic also provides integrations for:

- Heroku Add-on
- JFrog Artifactory
- Webhook Connections

Webhook connections send alerts to third-party applications.

- Schedule Searches for Webhook Connections
- Set Up Webhook Connections
- Use the Audit Index with Webhook Connections
- Webhook Connection for AWS Lambda
- Webhook Connection for Datadog
- Webhook Connection for HipChat
- Webhook Connection for Microsoft Azure Functions
- Webhook Connection for New Relic
- Webhook Connection for PagerDuty
- Webhook Connection for Slack
- Webhook Connections for Jira
- **Webhook Connection for Opsgenie**

- **ServiceNow**
  - No image available
  
  With ServiceNow integration, search results from Sumo Logic can be uploaded to your organization's ServiceNow account.
  
  - Launch Investigations
  - Set Up Searches for ServiceNow Integration
  - Set Up ServiceNow Connections
  - Set Up a ServiceNow Incident Webhook Connection

- **Heroku Add-On**
  - No image available
  
  Sumo Logic provides an add-on for Heroku that fully integrates the power of Sumo Logic log analytics for Heroku users.
  
  - Sumo Logic Add-on for Heroku

- **JFrog Artifactory Sumo Logic Integration**
  - No image available
  
  The JFrog Artifactory Sumo Logic integration provides the ability to access preconfigured Sumo Logic Dashboards directly from Artifactory that will allow you to analyze data from your Artifactory logs.
