Hosts and Operating Systems

This guide has documentation for Sumo apps for monitoring host metrics and the Linux operating system. If you're looking for an app for Microsoft Windows, see Microsoft and Azure.

- Host Metrics

The Sumo Logic App for Host Metrics allows you to collect your local host metrics and display them using predefined search queries and Dashboards.

- Collect Host Metrics for the Host Metrics App
Install the Host Metrics App and view the Dashboards

• Linux

![Linux logo]

Allows you to view the events, logins, and security status of your Linux system.

◦ Collect Logs for Linux
◦ Install the Linux App and view the Dashboards
◦ Suggested Searches for Linux OS

• Linux Performance

![Linux Performance logo]

This app has been deprecated in favor of using Host Metrics for your Linux servers.
