This guide has documentation for Sumo apps for SAAS and Cloud applications.

- **Acquia**

  The Sumo Logic App for Acquia provides visibility into the key components of the Acquia platform with preconfigured dashboards for Apache, Varnish, PHP, FPM and Drupal.
  
  - Collect logs for the Acquia App
  - Installing the Acquia App and viewing the Dashboards

- **Akamai Cloud Monitor**

  Allows you to analyze and correlate Akamai data with origin data.
  
  - Collect Logs for Akamai Cloud Monitor
  - Install the Akamai Cloud Monitor App and view the Dashboards
• **Box**

![Box icon](image)

Provides insight into user behavior patterns, monitors resources, and even tracks administrative activities.

- Collect Events for Box
- Install the Box App and view the Dashboards

• **Fastly**

![Fastly icon](image)

Fastly is a content delivery network (CDN) that provides you control over how and where you serve content, access to real-time performance analytics, and the ability to cache unpredictably changing content at the edge. With the Sumo Logic Fastly App, you can examine performance by origin, quality of service, and monitor your visitor traffic for important patterns using pre-defined searches and Dashboards for real-time visibility into your environment.

- Collect Logs for Fastly
- Install the Fastly App and view the Dashboards

• **Istio**

![Istio icon](image)

This Sumo Logic App for Istio provides visibility into the health and performance of Istio and its control plane components, including Mixer, Galley, Citadel, Pilot and Envoy. App dashboards also allow you to monitor how services and applications are performing in Istio Mesh, providing insights into service latency, errors, network traffic, and request workloads.

- Collect logs and metrics for the Istio App
- Install the Istio App and view the Dashboards
• **Opsgenie**

![Opsgenie Logo]

The Opsgenie App provides at-a-glance views and detailed analytics for alerts on your DevOps environment, allowing you to effectively monitor and gain valuable insights into your incidents and incident handling operations.

- Collect Logs for Opsgenie
- Install the Opsgenie App and view the Dashboards

• **PagerDuty V1**

![PagerDuty Logo]

The Sumo Logic App for PagerDuty V1 collects incident messages from your PagerDuty account via a webhook, and displays that incident data in pre-configured Dashboards so you can monitor and analyze the activity of your PagerDuty account and Services. The Sumo Logic App for PagerDuty V1 uses Webhooks V1.

- Collect Logs for PagerDuty V1
- Install the PagerDuty V1 App and view the Dashboards

• **PagerDuty V2**

![PagerDuty Logo]

The Sumo Logic App for PagerDuty V2 collects incident messages from your PagerDuty account via a webhook, and displays that incident data in pre-configured Dashboards so you can monitor and analyze the activity of your PagerDuty account and Services. The Sumo Logic App for PagerDuty V2 uses Webhooks V2, providing enhanced context for alert object models.

- Collect logs for PagerDuty V2
- Install the PagerDuty V2 App and view the Dashboards
• **Salesforce**

![Salesforce logo]

The Sumo Logic App for Salesforce analyzes logs generated by Salesforce Event Monitoring, which provides insight into your Salesforce instance and Salesforce apps.

- Collect Logs for the Salesforce App
- Install the Salesforce App and view the Dashboards

• **Slack**

![Slack logo]

The Sumo Logic App for Slack provides monitoring and data analytics for slack users, channels, access logs for workspaces with free, standard, and plus plans. Enterprise workspace plans can also utilize the app for audit logs along with users, channels and access logs. The Slack App only covers public channels.

- Collect logs for the Slack App
- Install the Slack App and view the Dashboards

• **Zoom**

![Zoom logo]

The Sumo Logic App for Zoom provides visibility into how Zoom is being used across your organization.
displaying analytics on performance, availability, security, and user activity.

◦ Collect Logs for the Zoom App
◦ Install the Zoom App and view the Dashboards
