This guide has documentation for Sumo apps for SAML providers. If you're looking for an app for a SAML solution from AWS, Microsoft, or Google, see Amazon and AWS, Microsoft and Azure, or Google.

- Okta

Okta provides secure connections between people and your applications on any device through identity management service built for the cloud. The Sumo Logic App for Okta helps you monitor the admin actions, failed logins, successful logins, and user activities to your applications through Okta.

- Collect logs for Okta
- Install the Okta App and View the Dashboards
OneLogin is an Identity Management provider that supplies a comprehensive set of enterprise-grade identity and access management solutions, including single sign-on (SSO), user provisioning, and multi-factor authentication. The Sumo Logic App for OneLogin provides real-time visibility and analysis of OneLogin user activity through event data, such as user logins, administrative operations, and provisioning.
