

# **Updating App Central Integrations**

Welcome to the step-by-step guide on how to update your integrations with custom user-defined outputs. Specifically tailored for integrations that feature actions with outputs personalized by the user, this guide will walk you through the preliminary steps and the update process to ensure that you can successfully upgrade your integrations while preserving your custom configurations with ease.

#### **Preliminary Steps**

Before you begin, ensure that you have administrative access to the Automation App Central and the integrations you wish to update. Have a text editor handy for editing code snippets.

#### **Step 1: Accessing Integrations**

- Navigate to the integration section by selecting Automation/Integrations.
- Use the search function to locate the specific integration you wish to update.

#### **Step 2: Editing Actions**

- Move your cursor over the action you need to update, revealing the Edit button.
- Click Edit to proceed with the necessary modifications.

		Add Blacklist Items	Edit 😮 🗄 🗊 🤗	Connect to Network	
		Delete Blacklist Items		Disconnect from Network	
		Get Activities	0	Cat Alarts	0

#### Step 3: Managing Certificate Integrations

- For certificate integrations, note that the read-only mode is automatically enabled.
- To make changes, click on the EDIT toggle which allows you to view the output.

# Step 5: Saving Output

- Open your preferred text editor.
- Paste the copied content into the editor.
- Save the file on your computer using the same name as the action you are updating.

### **Updating Process**

Once you have completed the steps for all actions with custom output, follow these instructions to apply the updates.

### Step 6: Locating Integration for Update

- Return to App Central and use the search function to find the integration.
- Click on the integration card to view more options.

## Step 14: Customizing Additional Actions

• If you have other actions to customize, repeat the same steps for each one.

## Conclusion

By carefully following this guide, you should now have a clear understanding of how to update your App Central integrations that include actions with user-customized outputs. Remember, this process is designed to help you maintain your personalized configurations while upgrading to the latest version of the integration. If you encounter any issues or have questions regarding the update process, please feel free to reach out for further assistance.
